IA – CERTIFICATE

(Review required by MASC as per ARP 0108)

IN TERMS OF REGULATION 21.17.2 OF THE MINERALS ACT (INCORPORATION THE MINE HEALTH AND SAFETY ACT) AND REGULATION 9 (1) OF THE ELECTRICAL MACHINERY REGULATIONS OF THE OCCUPATIONAL HEALTH AND SAFETY ACT

Ex – Type Examination

Certificate number: MASC M/16-0230X
Equipment: HS-100 Series Accelerometer
Serial No: (See “Conditions of Certification”)

Applicant: Hansford Sensors SA
Address: Unit 31-32
Buena Vista Office Park
Durbanville
7560

Manufacturer: Hansford Sensors Limited
Address: Artisan
Hillbottom Road
Sands Industrial Estate
Bucks
HP12 4HJ
United Kingdom

DESCRIPTION:

The HS-100 Series Accelerometer is designed to measure acceleration, shock or vibration by converting the signal generated by the compression of a Piezo Electric Crystal by a given seismic mass and outputting a broadband ac signal to the monitoring equipment.

The accelerometer comprises a piezo electric crystal connected to a signal conditioning board all contained within a stainless steel enclosure of various shapes measuring approximately 25cm³. The enclosure is a fully welded construction.

Electrical connections are made to the apparatus either via an IP65 rated connector or via an integral cable which is encapsulated in the end of the apparatus.

The non-fused version of the apparatus (HS-100Mxxxxxxx and HS-100MSxxxxxxx) has the following terminal parameters:

Connector only	10m of Cable	92m of Cable
U _i = 28V	U _i = 28V	U _i = 28V
I _i = 93mA	I _i = 93mA	I _i = 93mA
P _i = 0.65W	P _i = 0.65W	P _i = 0.65W
C _i = 1.0nF	C _i = 19.9nF	C _i = 83nF
L _i = negligible	L _i = 6μH or L _i /P _i = 15.4μ H/Ω	L _i /P _i = 15.4μ H/Ω

/I. The fused...

This document will not be supported by MASC for certification purposes outside the borders of South Africa.

IA CERTIFICATE NUMBER: MASC M/16-0230X
HS-100 Series Accelerometer

The fused version of the apparatus (HS-100MFxxxxxxx and HS-100SFxxxxxxx) has the following terminal parameters:

Connector only	10m of Cable	92m of Cable
$U_i = 16.5V$	$U_i = 16.5V$	$U_i = 16.5V$
$C_i = 1.0nF$	$C_i = 5nF$	$C_i = 41nF$
$L_i = \text{negligible}$	$L_i = 6\mu H$ or $L_i/P_i = 15.4\mu H/\Omega$	$L_i/P_i = 15.4\mu H/\Omega$

DETAILS OF CERTIFICATE CHANGES (for issues 1 and above):

Variation 6.1

To permit additional terminal parameters to be added for connector only variants (no cable included) and 10m of cable. The Annex containing the terminal parameters has been removed and the terminal parameters have been included in the equipment description.

MARKING:

SGS Baseefa marking remains applicable. The following MASC Certificate number (IA number) must be additionally applied to the equipment.

IA No: MASC M/16-0230X

COMPLIANCE:

The equipment as described above and in MASC letter 16-0230 is hereby certified "Explosion Protected" Ex ia I Ma (-55°C ≤ Ta ≤ +110°C) and is suitable for use in hazardous locations as stated below and as tested, assessed and inspected in accordance with the relevant requirements of SANS / IEC Standards:

The evaluation was conducted according to the requirements of:

- i) SANS (IEC) 60079-0 : 2012 "Explosive atmospheres – Part 0: Equipment — General requirements"
- ii) SANS (IEC) 60079-11 : 2012 "Explosive atmospheres – Part 11: Equipment protection by intrinsic safety 'i'"

Location	Zone 0, 1 & 2	Mining: Underground
Hazard Frequency	---	Continuous as could occur under normal operating conditions in hazardous area
Environment	Group I	Methane and Coal dust
Surface Temperature		
Service/Ambient Temperature	$-55^{\circ}C \leq T_a \leq +110^{\circ}C$	

/. The use...

This document may only be reproduced in full.
This certificate is not transferable and remains the property of the issuing body.
This document will not be supported by MASC for certification purposes outside the borders of South Africa.

The use of apparatus in hazardous locations is subject to the following provisions as applicable, which shall be adhered to:

- i. SANS 10086 requirements;
- ii. Any conditions mentioned in the above document;
- iii. Codes of Practice enforced in terms of Regulations 21.17.2 of Minerals Act, by Chief Inspector of Mines;
- iv. Any restrictions and conditions enforced by Chief Inspectors of Mines, Principal Inspector (Group I equipment) of Chief Inspector of Factories (Group II equipment);
- v. Any relevant requirements of the MHS Act or the OHS Act.

CONDITIONS OF MANUFACTURE:

- None

SPECIAL CONDITIONS OF USE (X):

- The Ci of the non-fused version of the equipment (HS-100Mxxxxxxx and HS-100MSxxxxxxx) when fitted with 92m of cable has been increased from 41nF to 83nF.

CONDITIONS OF CERTIFICATION:

1. This Certificate remains valid based on a three yearly review covered by an official MASC letter.
2. The apparatus must be additionally marked with the MASC marking details above.
3. This approval only covers the equipment as certified above and does not include any scheduled additions or variations / amendments / new issues to the certificate(s), made after the above date.
4. The equipment does not need to be re-tested when used on the conditions and with such restrictions as prescribed by SGS Baseefa and in this approval.
5. The SGS Baseefa certification must remain valid.
6. The extent of the requirements in the ARP 0108 (or regulations) and SANS 10108 on the certification of the equipment must remain unchanged.
7. The Ex quality assurance notification/report for the equipment must remain valid.

Mining And Surface Certification

This document is issued based on Mining And Surface Certification's Standard Contract terms and conditions available on request.

While every endeavor is made to ensure that a test / assessment is representative and accurately performed, and that a report is accurate in the quoted results and conclusions drawn from the test / assessment, MASC or its members/employees shall in no way be liable for any error made in carrying out the test / assessment or for any erroneous statement, whether in fact or in opinion, contained in a report issued pursuant to a test / assessment.

MASC takes no responsibility for any non-conformances, exclusions or any results / assessments not in compliance with the standards. By marking the equipment in accordance with the documentation / standard, the manufacturer attests on his own responsibility that the equipment has been constructed in accordance with the applicable requirements of the relevant standards and that the routine verifications and routine tests have been successfully completed and the product complies with the documentation and standard(s).

This document is only for use and application in South Africa. It is issued based on National interpretations and accepted practices.

This document may only be reproduced in full.
This certificate is not transferable and remains the property of the issuing body.
This document will not be supported by MASC for certification purposes outside the borders of South Africa.

MASC Letter: 16-0230

MASC MARKING:

SGS Baseefa marking remains applicable. The following MASC Certificate number (IA number) must be additionally applied to the equipment.

IA No: MASC M/16-0230X

PROCESS / ASSESSMENT:

The SGS Baseefa documentation was selectively evaluated for technical content and was studied for authenticity.

SGS Baseefa is an EXTL and ACB under the IECEx system. South Africa is a member of the IECEx scheme. The Certificate's validity and acceptability is acknowledged. An IA certificate is issued for the product.

CONDITIONS OF MANUFACTURE:

- None

SPECIAL CONDITIONS OF USE (X):

- The Ci of the non-fused version of the equipment (HS-100Mxxxxxxx and HS-100MSxxxxxxx) when fitted with 92m of cable has been increased from 41nF to 83nF.

CONDITIONS OF CERTIFICATION:

1. This letter covers all units sold from the date of this letter to 23 February 2019.
2. The apparatus must be additionally marked with the MASC marking details above.
3. This approval only covers the equipment as certified above and does not include any scheduled additions or variations / amendments / new issues to the certificate(s), made after the above date.
4. The equipment does not need to be re-tested when used on the conditions and with such restrictions as prescribed by SGS Baseefa and in this approval.
5. The SGS Baseefa certification must remain valid.
6. The extent of the requirements in the ARP 0108 (or regulations) and SANS 10108 on the certification of the equipment must remain unchanged.
7. The Ex quality assurance notification/report for the equipment must remain valid.

/ . CONCLUSION...

This document may only be reproduced in full.
This document will not be supported by MASC for certification purposes outside the borders of South Africa.

MASC Letter: 16-0230

CONCLUSION:

From the above and the selective examination of the documentation, nothing contrary to the requirements of the applicable standards was found, provided that the equipment/component is used as described in the above document/certificate and according to the MASC conditions below. A MASC IA certificate is issued based on the work done by SGS Baseefa.

The routine tests for production units according to the SGS Baseefa Certificate must be complied with (if applicable).
