September 2017

New product alert

We have developed a brand-new conduit cable for our AC accelerometers. This Stainless-Steel conduit with FEP cable is highly resistant to rust and corrosion.

The product is flexible and offers high compression and tensile strength. The conduit cabled accelerometer can be utilised in the following industries: building services, pulp and paper, mining, metals, utilities, automotive, marine and pharmaceuticals.

The Conduit Cable is currently available for the top and side entry HS-100s (our standard AC) and HS-150s (our sheer manufactured AC range).

Tom goes full throttle at Silverstone

Tom has once again raced to success in recent events. Tom came 1st on race 1 and second on race 2 at Silverstone recently. An amazing achievement for Tom, whom we proudly sponsor. With one race left of the current season, Tom is currently 'sitting pretty' – ranking 4th out of the 36 drivers taking part. He also ranks as the top independent driver! We wish him well for the next race and cannot wait to congratulate him on what we are sure will be a winning event!

Wedding bells!

Kai, our German business manager, got married at the end of August to his beautiful wife Lena. Kai will be changing his surname from Gessenich to Thiebes. Kai has opted to take Lena's surname, due to her career in academia and being a published author in her pursuit. Kai and Lena have just come back from their amazing honeymoon. We wish them a very happy marriage!

Upcoming exhibitions

Don't forget to come and say 'hi' to us at the upcoming conferences and exhibitions.

We will be attending both IMC and IMVAC in the USA this November. If you can't wait until then to see us, we will be present at several other conferences, including Bearing Reliability Conference and expo (BRCE) in Germany and Maintenance in Poland – both next month.

See you there!
