Dear Reader,

We hope this newsletter finds you well and that you've had a productive start to the year. Spring is in the air, and at Hansford Sensors, we're buzzing with exciting updates. We're thrilled to share them with you.

LATEST UPDATES AT HANSFORD SENSORS

New White Paper: Understanding and Addressing Frame Vibrations

We're excited to share our latest White Paper: "Addressing Frame Vibrations: Causes, Measurement, and Solutions." This in-depth resource explores the critical issue of frame vibrations in machinery, a problem often stemming from mounting issues.

The White Paper delves into:

- The root causes of frame vibrations due to mounting problems, such as resonance, improper mounting surfaces, insufficient damping, misalignment, dynamic imbalance, and loose fasteners.
- The use of accelerometers for precise vibration measurements, including optimal placement and key measurement parameters like frequency spectrum, amplitude, and phase relationships.
- Strategies for diagnosing and addressing frame vibration problems, covering methodologies, problem diagnosis, and mitigation strategies.

Download this valuable resource from our website to enhance your understanding of vibration monitoring and ensure smoother, safer, and more efficient operations.

Meet Us at Upcoming Events

We're excited to connect with you in person. Join us at the following upcoming conferences:

📍 Check out the full list here: [Events](#)

Our team will be on hand to showcase our latest products, answer your questions, and discuss how we can help you achieve your vibration monitoring goals. We look forward to seeing you there.

💡 Let's make 2025 a year of innovation and collaboration—see you at the events.

HOUSTON
TEXAS
7-8 April 2025

Product Spotlight: HS-150 - Premium Accelerometer

- 🎯 Precise measurements in challenging environments
- 🔄 Continuous monitoring capability
- ⚡ Fast response time
- 🔧 Simple installation

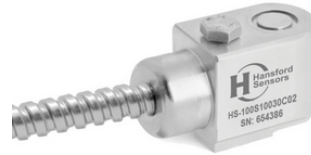

See why leading manufacturers trust the HS-150 for their condition monitoring needs.
